

# Construction materials: balancing cost and carbon choices on projects – poll results

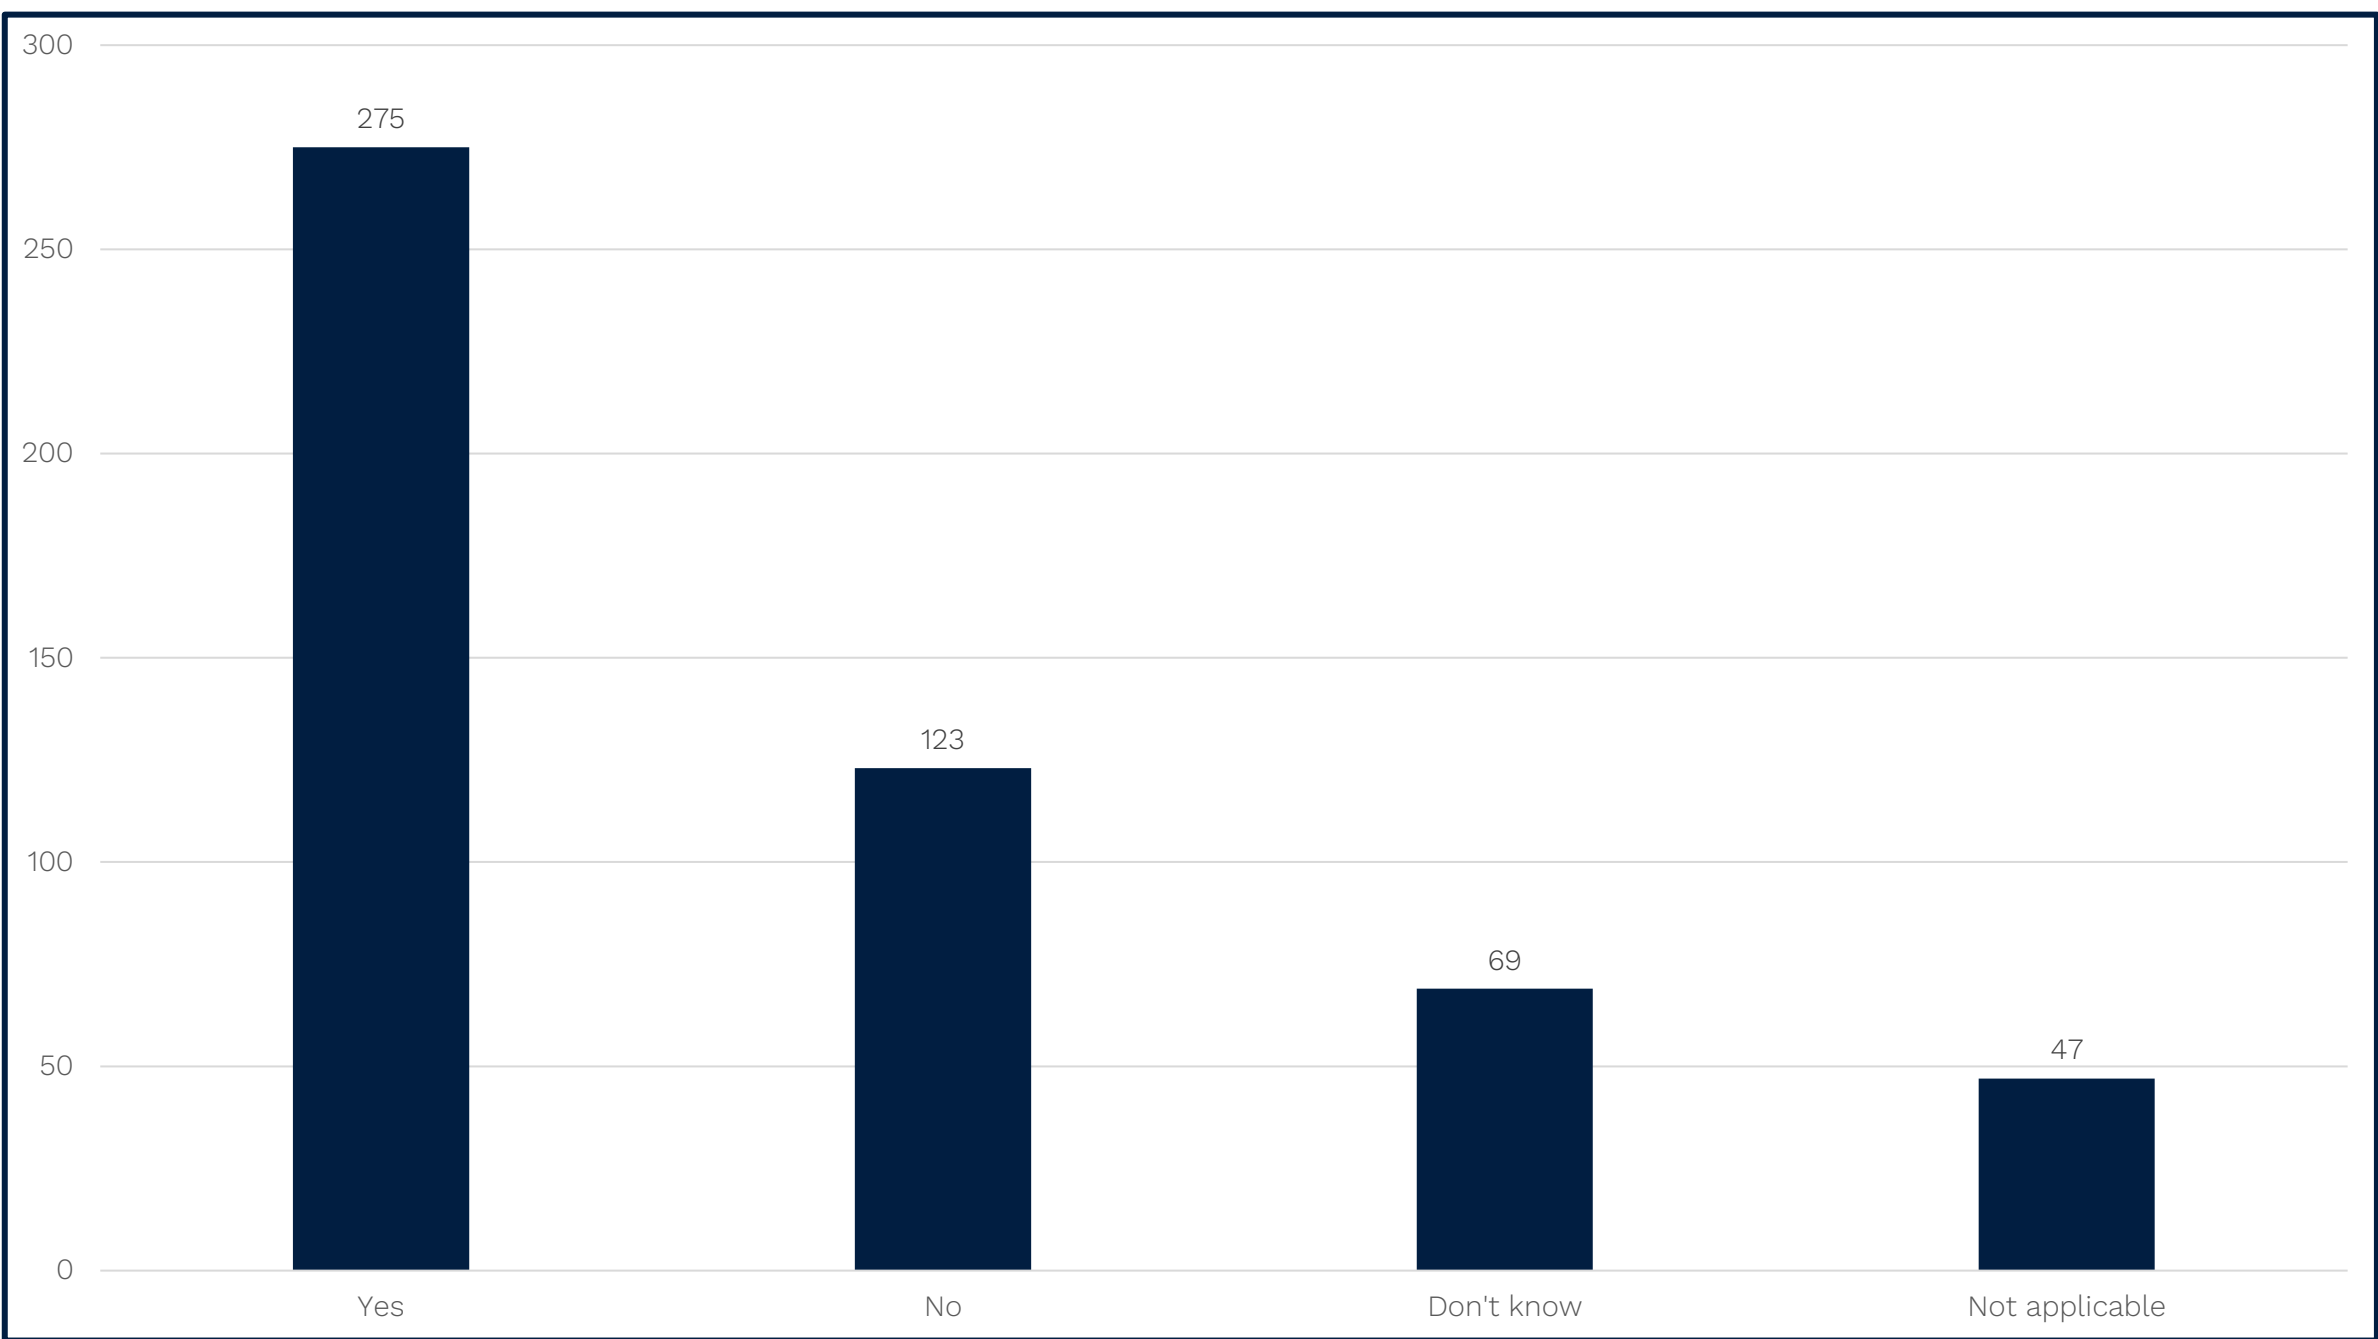

On 29<sup>th</sup> February 2024 BCIS broadcast a webinar entitled ‘Construction materials: balancing cost and carbon choices on projects’. During the webinar, a series of poll questions were asked with attendees given the opportunity to answer. The results are as below:

Q: How do you forecast prices changing when you're selecting materials for a future project?

Q: Is there a strategy to reach net zero in the firm you work for?
