

Ask the experts: combining cost and carbon in construction

Poll results

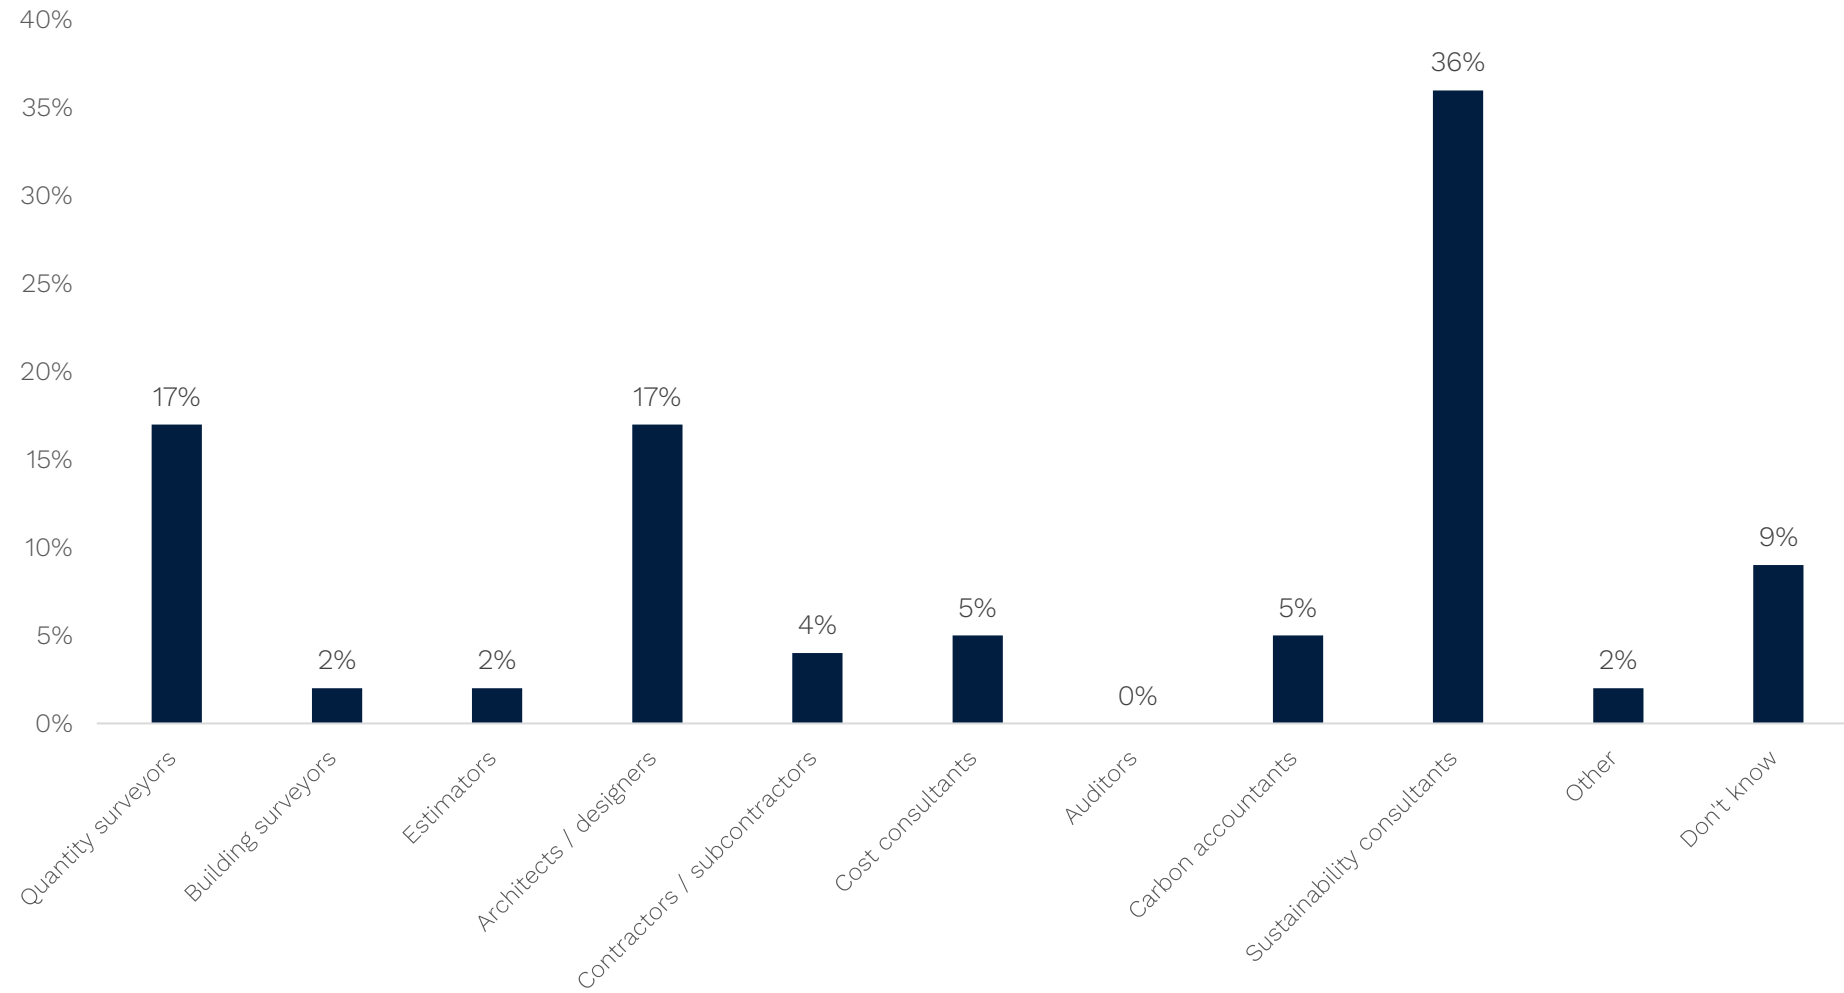

Webinar – 2nd May 2024

Would offering whole life carbon assessments be an enhancement to your job role / the service you offer?

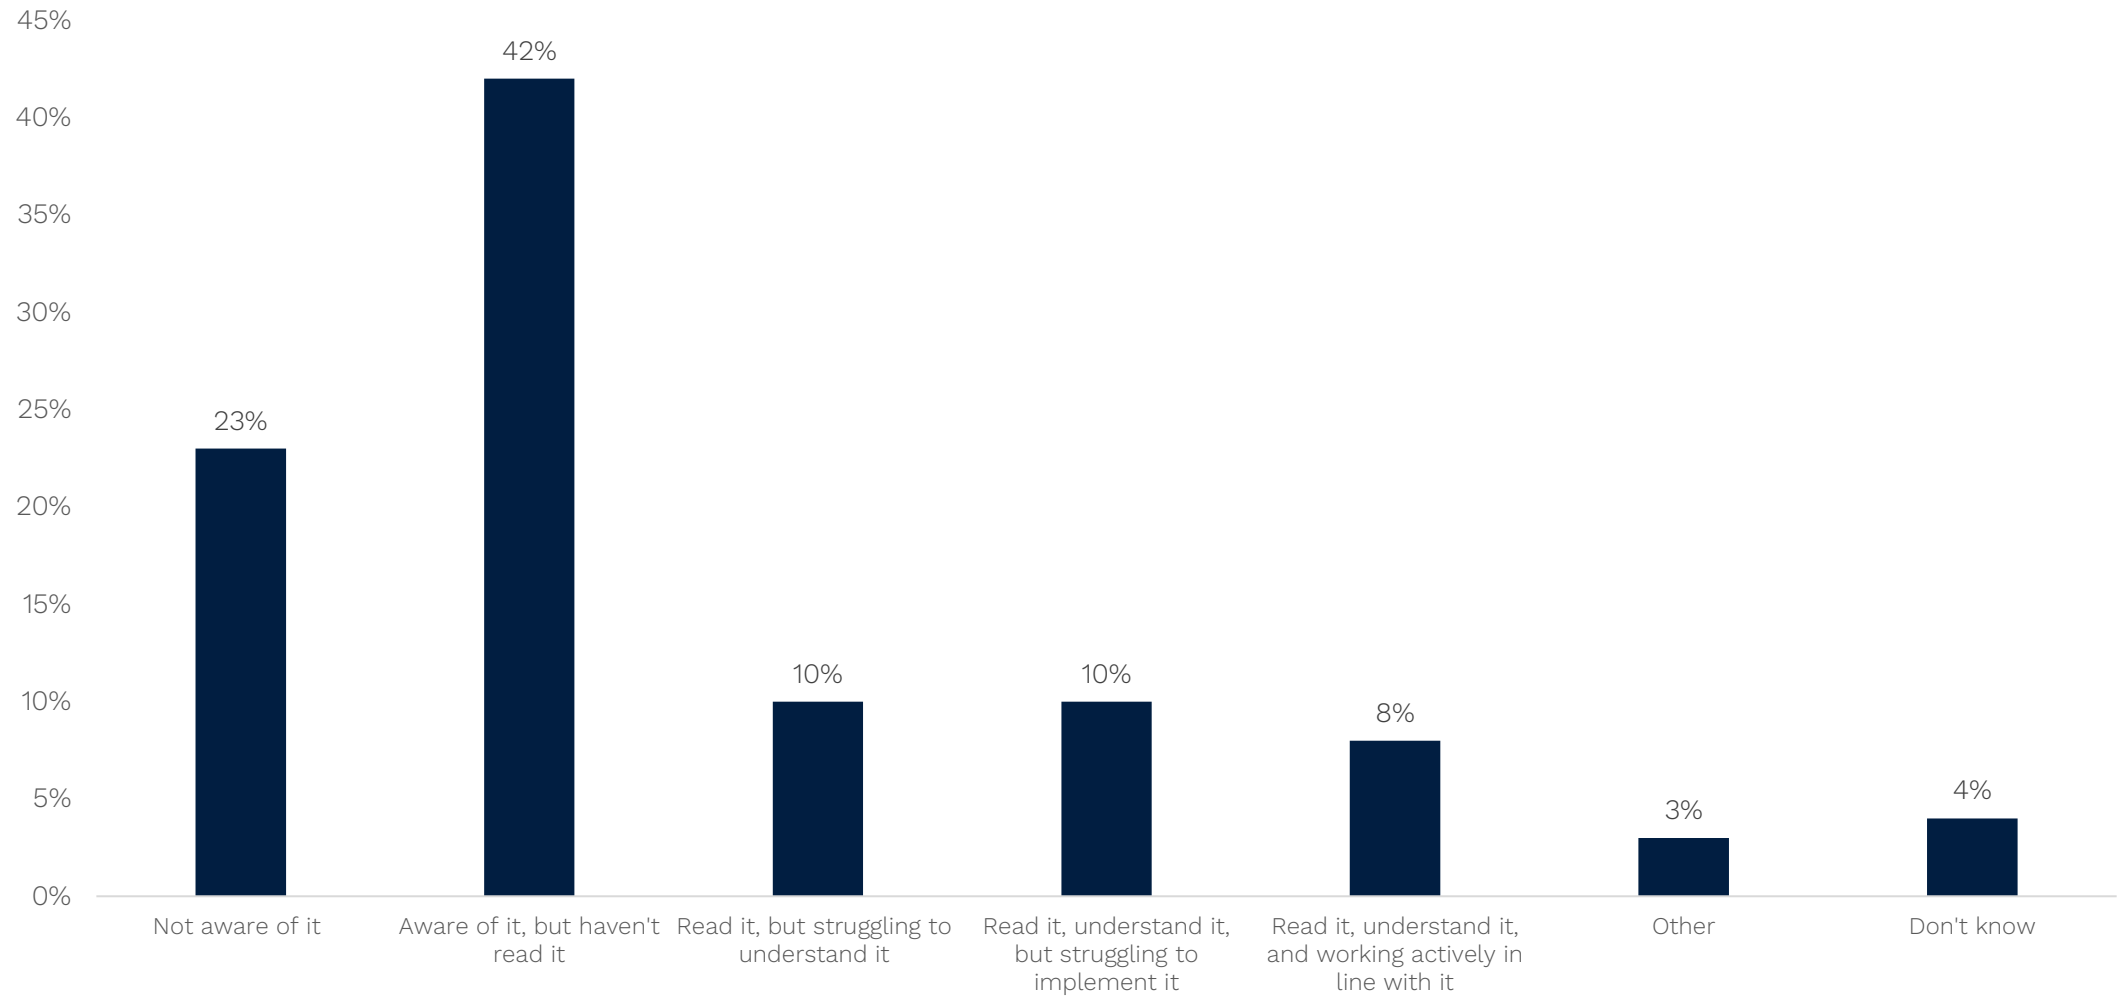

Sample size: 259

In your experience, who would typically be responsible for assessing the whole life carbon emissions on a project?

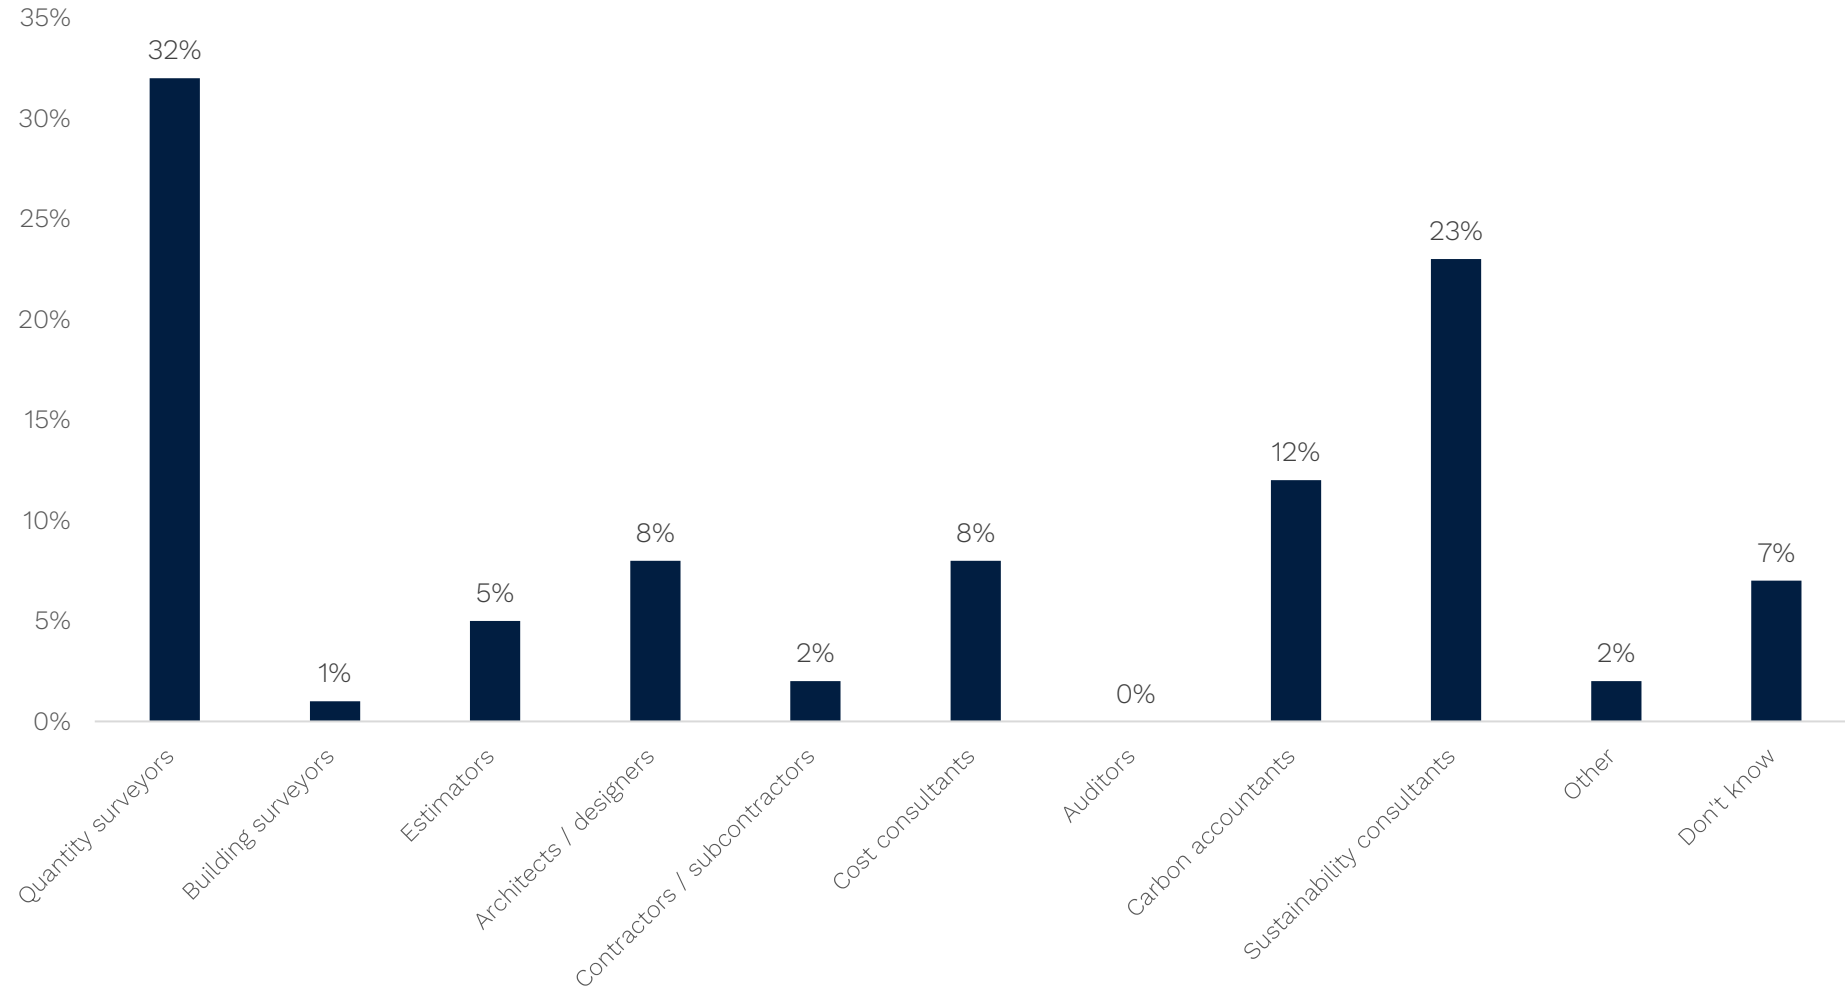

Sample size: 283

How would you summarise your current engagement with the RICS whole life carbon assessment for the built environment standard?

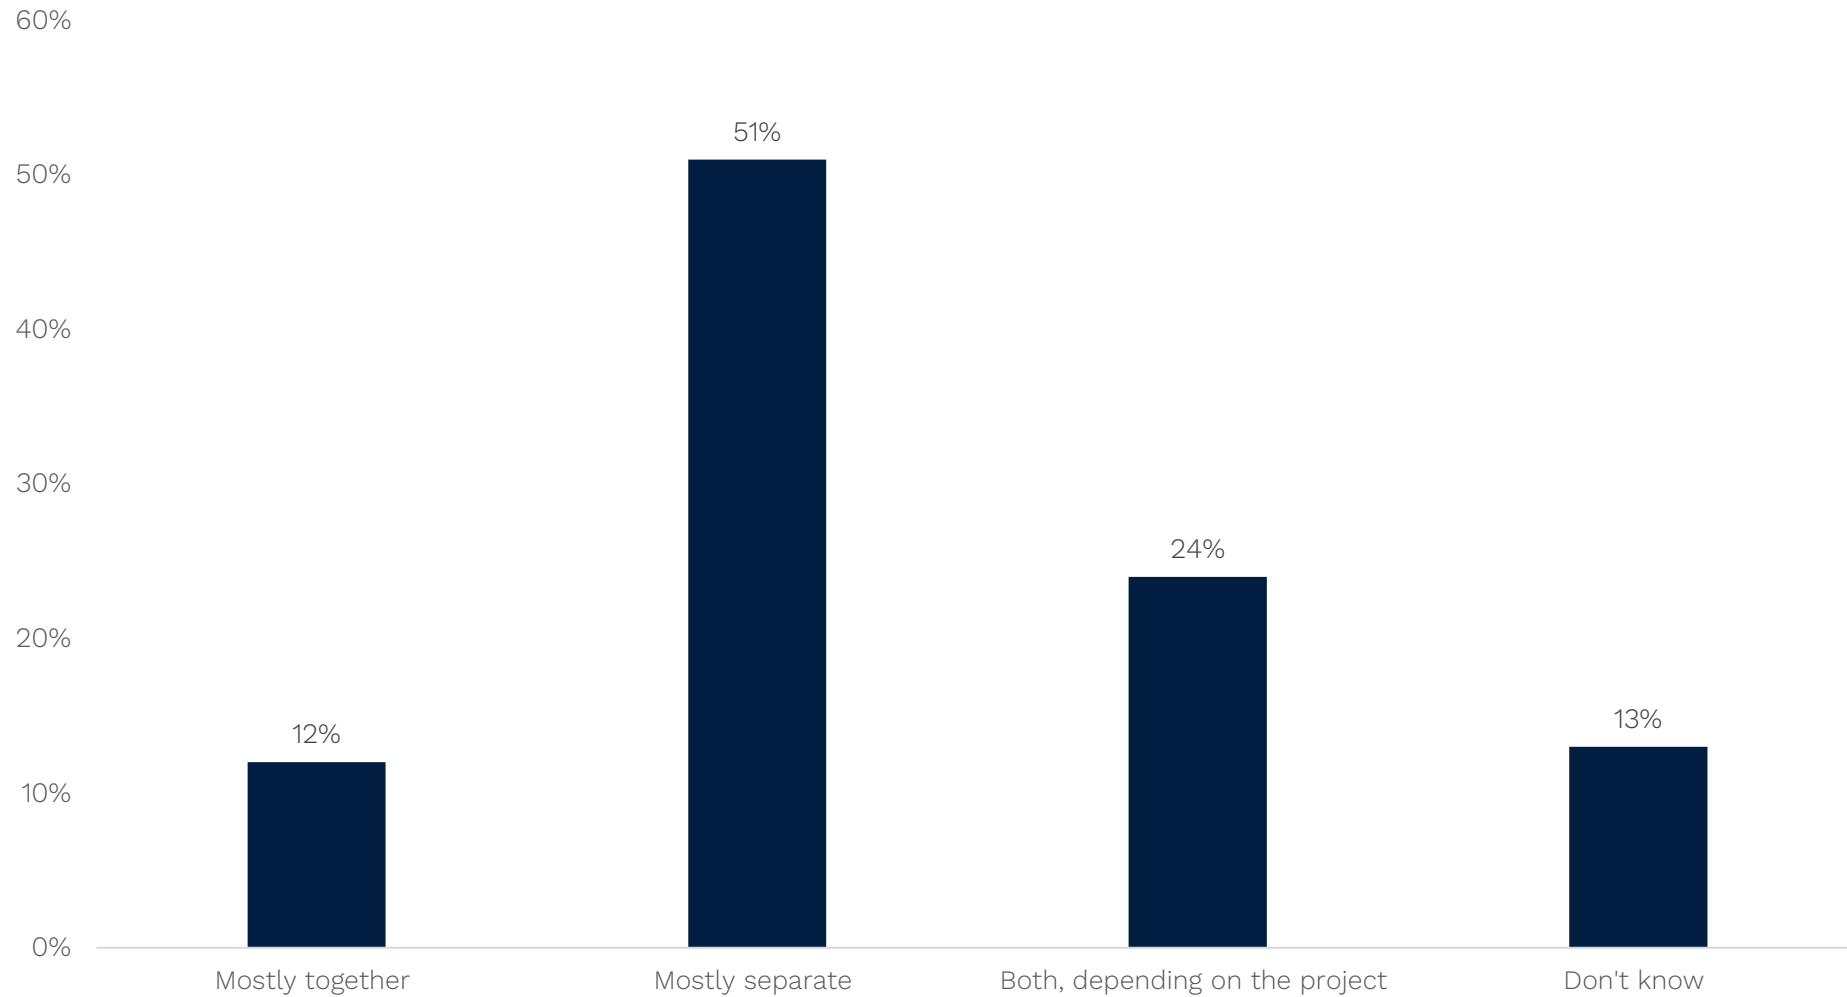

Sample size: 285

Who do you believe is best placed to measure / assess the whole life carbon emissions alongside the costs on a project?

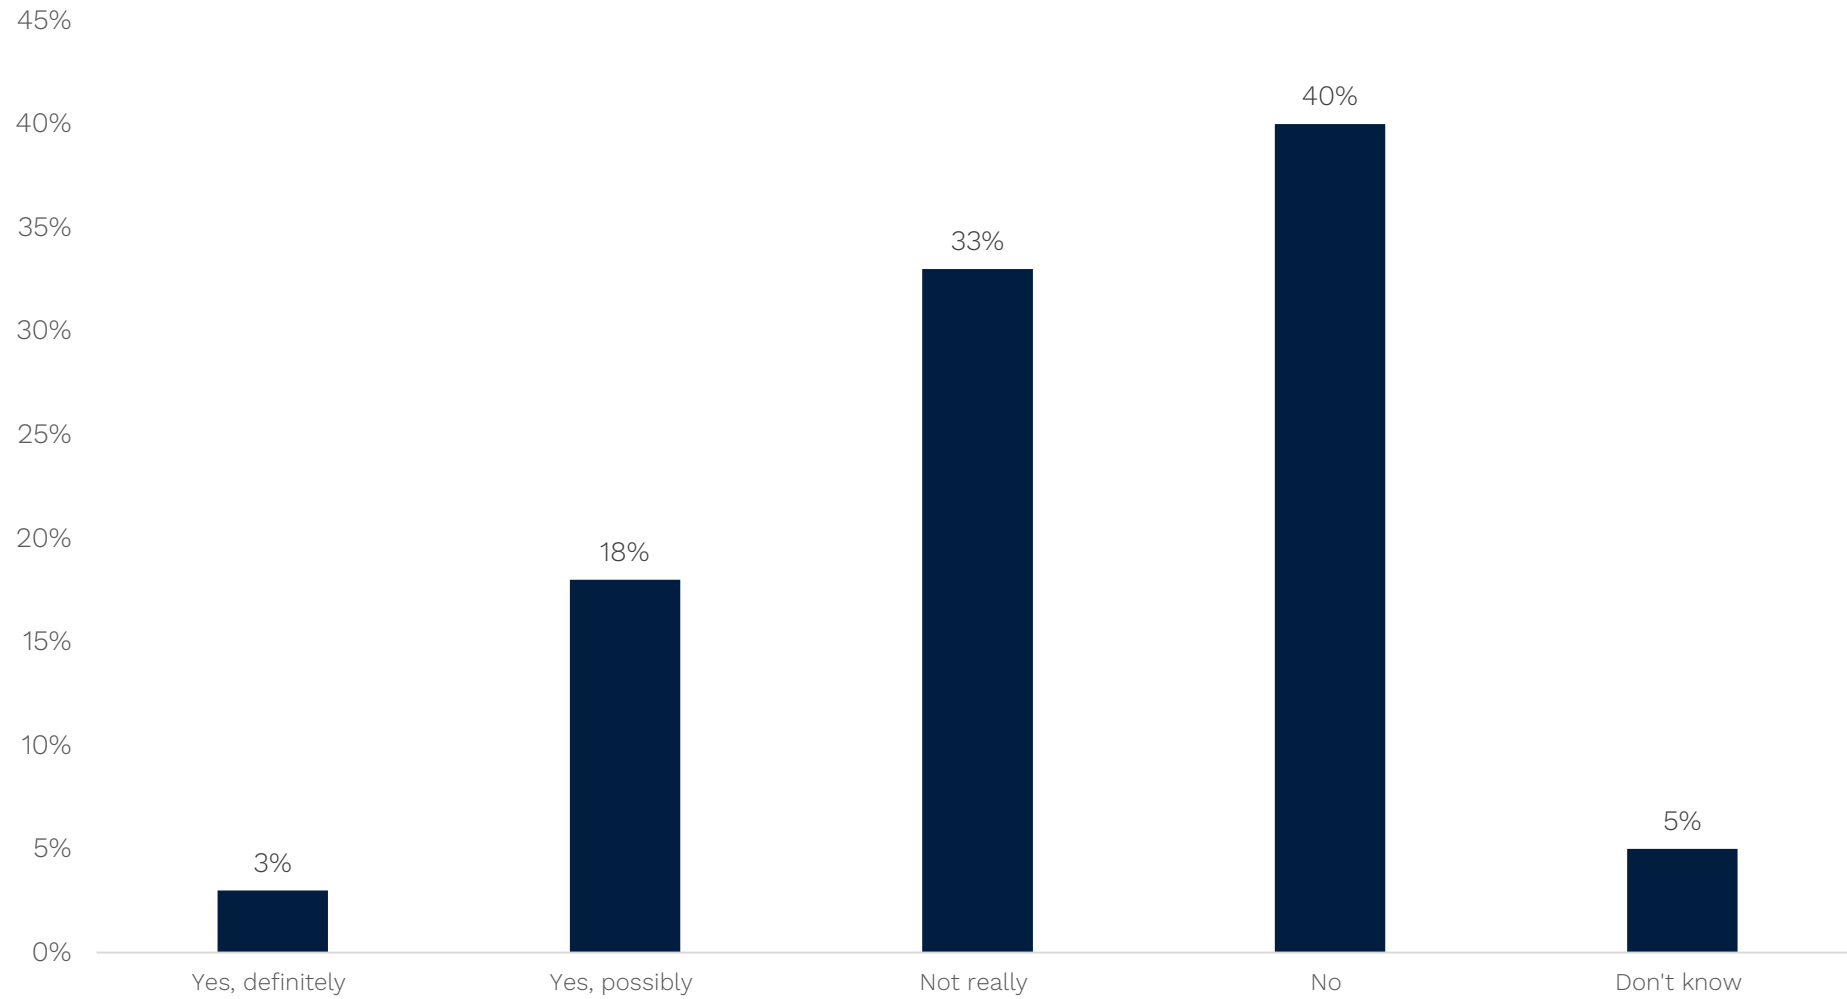

Sample size: 265

In recent projects you have been involved with, have cost and carbon tended to be considered together or as separate issues?

Sample size: 241

Do you think you could spot an issue / anomaly with a carbon value on a project as confidently as you would a cost value?

Sample size: 248
